Message from the Chief Executive

Improved water management has moved towards the top of the public policy agenda and it is an exciting time to be in the industry.

Against this background, we've put together a conference programme with eight streams, and something for everyone. Visit our website for more details.

Given the growing public recognition of water as our key strategic resource, the policy stream will be of particular interest this year. We've invited an array of politicians, legal experts, water commissioners and others to give their perspectives.

Register now for the event in Christchurch between 22-24 September.

We look forward to seeing you there.
